

LDES NATIONAL CONSORTIUM

WILL MCNAMARA

CLOSING SESSION

Today we release our first set of Industry Recommendations

- ❖ The result of all of your contributions through the 16 Tiger Teams.
- ❖ The recommendations address the commercialization challenges referenced by the DOE's 2023 Lift-off Report.
- ❖ 11 challenges were assigned to the 16 Tiger Teams; most of the challenges now have 5-10 recommendations associated with them.
- ❖ Along with making the recommendations, we will be developing an implementation tracking system to track results. (Findings will be included in forthcoming assessment reports).

What's Coming Next?

- ❖ Additional commercialization challenges being assessed.
 - Next wave of Industry Recommendations to be developed in 4Q 2024.
 - Great opportunity to share your thoughts on challenges that should be considered.
- ❖ Geographical Assessments
- ❖ Technology Evaluation Matrix
- ❖ Demonstrations & Deployment Tracking System
- ❖ Modeling Tool Assessment
- ❖ Developing plan for industry transfer post 2026.

We'll start planning the 2025 Annual Workshop.

We welcome your suggestions on locations, speakers, networking sessions, etc.

I ask each of you to utilize your professional networks to bring in additional Teaming Partners.

Continuing to broaden the diverse perspectives we are representing, along with having the “agents of change” join us, will help us achieve even greater impact in 2025.

Through the Consortium, we have both the opportunity and the capabilities in place to drive LDES commercialization forward.

Let's keep building on our momentum to create market opportunities, establish enabling policies, and support customer needs.
